

Pigs Used — Pig Run Sheets vs Admin

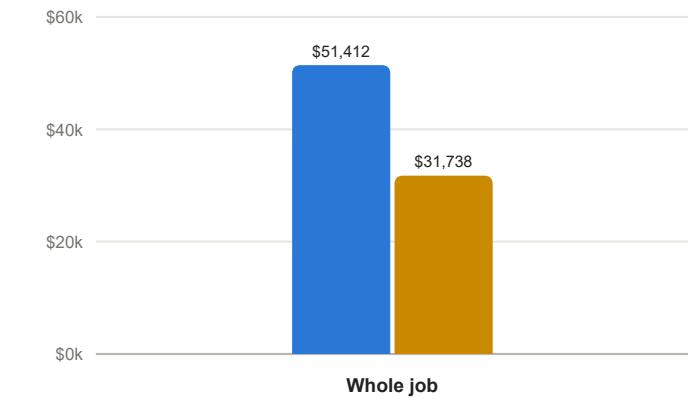

Pig run sheets: 38 field sheets, every pig row transcribed. Admin: the pig list behind the pre-invoice (379 pigs, \$51,411.80 before the 7% markup).

AdminPig run sheets — new pigs only

Pig cost (USD, before markup)

	ADMIN PIGS	ADMIN COST	PIG SHEETS — NEW PIGS	PIG SHEETS — COST	DIFFERENCE
Whole job	379	\$51,411.80	315	\$31,738.20	\$19,673.60

Used and bolted pigs are not counted above. The pig-sheet figures are new pigs only. A pig marked used (the Used Bolt / Used Pin column, or "U" / "used") is left out, and so is any unmarked bolted pig (BLT, Bolt, Bolted, TCB, HB, Re-bolt), which the crews run as a re-used pig. Admin's list has no new/used split, so every admin pig is counted and costed.

By heater — admin split inferred

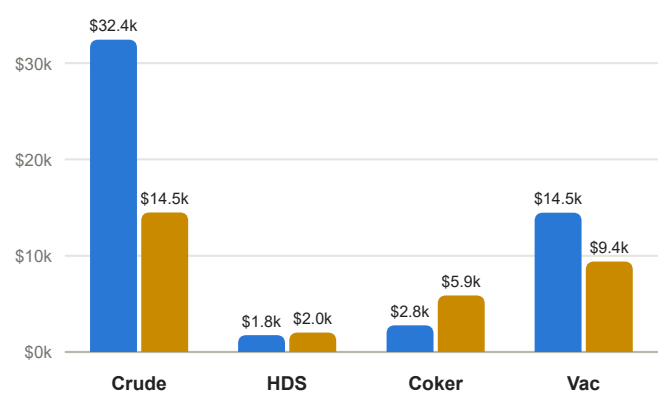

Admin's list does not name a heater. Each admin line is assigned to a heater by matching it, in order, to the service receipt it copies (e.g. admin lines 1–4 = Crude receipt 8402; lines 36–40 = Vac receipt 7082). The pig-sheet side is recorded per heater on the sheets themselves.

Costs use the rates on admin's pig list: same size and type where listed; any other pig priced as Pin; a size not on the list rounds up to the next listed size (above the list: 8" foam, 10" swab, 12" pin). "Cost — all pigs" prices every run, used and bolted included, at those same rates. Six pig sizes the sheets left blank were supplied by Jesse Utsey from the pigs before and after. Sources are shown side by side; none is treated as the correct one. Detail by size: USA26046-pig-counts.xlsx.
